PROJECT

BudgetBuddy

HTML, CSS, NodeJS, MongoDB

- Developed a personal finance management system utilizing HTML, CSS, Node.js, and MongoDB. The application enables users to track income and expenses, generate detailed financial reports, and monitor their financial health in real-time. Implemented secure user authentication using JSON Web Tokens (JWT) and ensured data integrity with encrypted storage. The system features a responsive user interface and efficient data handling through MongoDB. Future enhancements planned include API integrations, mobile app development, and advanced financial analytics.
